

REFORA — E-Commerce Website Requirements

We are launching REFORA with one product initially, but the website should be built in a way that allows us to easily add multiple products, categories and variants in the future.

1. Design & Branding

- * Premium, minimal and clean design matching REFORA's branding
- * Modern, elegant and trustworthy aesthetic
- * Mobile-first and fully responsive design
- * Optimized for mobile, tablet and desktop
- * Consistent typography, colours, buttons and visual elements
- * Fast-loading website
- * Easy and intuitive navigation

Home

- Hero/banner section
- * REFORA introduction
- * Featured/current product
- * Product benefits/features
- * Brand story
- * Customer reviews/testimonials
- * Instagram/social media section
- * FAQ preview
- * Call-to-action sections\
- * Review

(Please check the existing ecommerce site for all types) this is just a small checklist if i have left something kindly add it)

Like amazon type to represent both organicas and skincare product in home

Dedicated page: REFORA ORGANIC

This can become a major part of the brand identity.

Hero

REFORA ORGANIC

Pure essentials. Naturally sourced.

Thoughtfully chosen everyday essentials rooted in simplicity, purity and tradition.

Categories

-  Coconut Oil
-  Groundnut Oil
-  Ghee
-  Future organic/natural products

Then for each product:

- Product image
- Origin/source
- Ingredients
- How it's made/processed
- What makes it different
- Suggested uses
- Size/quantity
- Price
- Buy Now

About Us

- * REFORA story
- * Brand philosophy
- * Product/brand vision

Shop / Products

- * Product listing
- * Product categories
- * Search functionality
- * Filters/sorting where applicable
- * Ability to add more products/categories later

Individual Product Page

- * High-quality product images
- * Image zoom/gallery
- * Product name
- * Price
- * MRP/discount if applicable
- * Product description
- * Benefits/features
- * Ingredients/materials/specifications
- * How to use
- * Quantity/variants if applicable
- * Stock availability
- * Customer reviews & ratings
- * Add to Cart / Buy Now
- * Related products

3. Cart & Checkout

- * Add/remove/update product quantity
- * Cart summary
- * Apply coupon/discount code
- * Pincode entry
- * Shipping charge calculation
- * COD availability based on pincode
- * Guest checkout
- * Customer account/login option
- * Address management
- * Order summary before payment
- * Mobile-friendly checkout
- * GST details where applicable

4. Payment Gateway

Integration with a reliable payment gateway such as Razorpay.

Payment methods should include:

- * UPI
- * Credit/Debit Cards
- * Net Banking
- * Wallets/other supported methods
- * COD

Required handling for:

- * Successful payments
- * Failed payments
- * Pending payments
- * Cancelled payments
- * Refunds

5. Shipping Integration

Integration with Velocity/Shipfast.

Required:

- * Pincode-based serviceability
- * Pincode-based shipping charges
- * COD availability by pincode
- * Automatic order transfer to shipping partner
- * AWB/shipping label generation
- * Pickup request
- * Shipment tracking
- * Customer tracking page
- * Delivery status updates
- * Cancellation/return/RTO handling
- * Shipping rules/free shipping if applicable

6. Orders & Customer Notifications

After an order is placed, customers should receive confirmation through appropriate channels such as:

- * Email
- * WhatsApp
- * SMS, where applicable

Notifications for:

- * Order confirmation

- * Payment confirmation
- * Order shipped
- * Out for delivery
- * Delivered
- * Cancellation
- * Refund

7. WhatsApp Integration

- * WhatsApp contact button
- * Customer enquiry option
- * Order-related WhatsApp notifications if supported
- * Ability to connect REFORA's official WhatsApp Business account

8. Admin Dashboard

Admin should be able to manage:

Products

- * Add/edit/delete products
- * Prices
- * Images
- * Descriptions
- * Categories
- * Variants
- * Stock

Orders

- * View/manage orders
- * Order status
- * Customer details
- * Payment status
- * Shipping status
- * Cancellation/refund management
- * Export orders to Excel/CSV

Other

- * Coupon/discount management
- * Customer information
- * Basic sales/order analytics
- * Homepage/content management where possible

9. Marketing & Analytics

Integration/setup for:

- * Google Analytics 4
- * Google Search Console
- * Meta Pixel
- * Instagram
- * Facebook
- * WhatsApp

Also:

- * Newsletter/email collection
- * Abandoned-cart tracking/recovery capability
- * Social sharing
- * Product review/rating system

10. SEO

Basic technical SEO setup including:

- * SEO-friendly URLs
- * Page titles
- * Meta descriptions
- * Image alt text
- * Sitemap.xml
- * Robots.txt
- * Product structured data/schema
- * Google Search Console setup
- * Mobile SEO
- * Basic page-speed optimization

11. Legal Pages

Website should include editable pages for:

- * Privacy Policy
- * Terms & Conditions
- * Shipping Policy
- * Return & Refund Policy
- * Cancellation Policy
- * Cookie/consent information where applicable

12. Security

- * SSL/HTTPS
- * Secure payment integration
- * Secure admin login
- * Basic spam protection for forms
- * Regular website/database backup

- * Basic security configuration

13. Contact & Support

- * Contact Us page
- * Enquiry/contact form
- * Official email
- * WhatsApp
- * Social media links
- * FAQ section

14. Domain & Hosting

- * Connect refora.in
- * SSL configuration
- * Hosting setup
- * DNS configuration
- * Business email integration

15. Scalability

Although REFORA is launching with one product, the website must be scalable for:

- * Multiple products
- * Multiple categories
- * Product variants
- * Different pricing
- * Discounts/coupons
- * Inventory management
- * Future product launches
- * Additional payment/shipping options

Adding future products should not require redevelopment of the core website.

16. Ownership & Handover — IMPORTANT

All website-related assets must remain under REFORA's ownership.

This includes:

- * Domain
- * Hosting
- * Website/admin account
- * Source code
- * Database
- * Payment gateway account
- * Shipping account/API
- * Google Analytics
- * Search Console

- * Meta Pixel
- * Other third-party integrations

We should receive full admin access and credentials for all relevant accounts and services.

17. Post-Launch Support

Kindly provide

- * Warranty/bug-fixing period after launch
- * Maintenance/support charges
- * Response time for technical issues

Absolutely. If the **main objective is to sell COCOCRÈME**, the website requirement should go beyond simply “having an online store.” It needs to be built for **conversion, reach, repeat purchases, and marketing**.

Add this to your website requirement list:

Sales, Offers & Conversion Features

- **Coupon code system** — ability to create, edit, activate/deactivate and set expiry dates for coupons.
- **Percentage discounts** — e.g. 10%, 15%, 20%.
- **Fixed-amount discounts** — e.g. ₹20 off, ₹50 off.
- **First-order coupon** — special discount for new customers.
- **Minimum order value coupons** — e.g. ₹50 off on orders above ₹499.
- **Product-specific discounts** — discount only on selected products.
- **Bundle offers** — e.g. Buy 2 / Buy 3 / combo pricing.
- **Buy X Get Y offers** — ability to run promotional campaigns later.
- **Limited-time offers / countdown timer** for launches and campaigns.
- **Automatic discounts** without requiring a coupon code.
- **Free shipping threshold** — e.g. free shipping above a certain order value.
- **Cart abandonment recovery** — email/WhatsApp reminders for customers who leave items in their cart.
- **Wishlist** — customers can save products for later.
- **Related products / “You may also like”** to increase order value.
- **Upselling and cross-selling** at product page, cart and checkout.
- **Customer reviews and ratings** with photo/video review capability.
- **Referral/ambassador system** — ability to introduce referral codes later.
- **Gift cards / store credits** — preferably available for future expansion.
- **Repeat-purchase incentives** — coupons or offers for existing customers.

Reach & Marketing — VERY IMPORTANT

The website should be built with customer acquisition and sales as a primary objective, not merely as an informational website. It should be SEO-ready, fast, mobile-first and optimized for conversion.

Include:

- SEO-friendly page structure and URLs.
- Google Search indexing and **Google Search Console** setup.
- Google Analytics / appropriate analytics setup.
- Meta Pixel / Meta advertising integration.
- Google Ads conversion tracking.
- Conversion tracking for **View Product → Add to Cart → Checkout → Purchase**.
- Social sharing buttons.
- Instagram integration.
- WhatsApp integration for customer enquiries/orders.
- WhatsApp click-to-chat.
- Email marketing integration.
- Newsletter/email collection.
- Promotional pop-ups/banners that can be switched on/off.
- Landing pages for Instagram/Google/Meta campaigns.
- SEO metadata for every product/page.
- Product structured data/schema where appropriate.
- Fast loading, especially on mobile.
- Image compression/WebP and performance optimization.
- Sitemap and robots.txt.
- Search-friendly product descriptions.
- Ability to create blogs/articles for SEO.
- Google Merchant Center/product-feed readiness if applicable.
- UTM/campaign tracking.

Checkout — make buying extremely easy

- Guest checkout.
- Mobile-number/email checkout.
- UPI.
- Cards.
- Net banking.
- Wallets where supported.
- **COD** if you decide to offer it.
- Shipping charge displayed clearly before payment.
- Coupon field clearly visible.
- Automatic discount calculation.
- Order confirmation by email.
- Order confirmation by WhatsApp/SMS if supported.
- Order tracking.
- Clear cancellation/refund process.
- Failed-payment recovery.

Admin panel — you **MUST** have control

You should be able to change **without calling the developer**:

- Product price
- MRP
- Product images
- Product description
- Stock
- Coupons
- Discounts
- Banners
- Offers
- Shipping charges
- Free-shipping threshold
- Homepage sections
- Blog posts
- Customer orders
- Order status
- Coupon expiry
- Promotional campaigns

And importantly:

All website, domain, hosting, payment gateway, analytics, Meta, Google, email, WhatsApp and other third-party accounts must remain under REFORA's ownership, with administrator access provided to REFORA.

One more thing I'd add

Because we launching a **premium brand**, don't make the website look like a discount store. The offers should be presented elegantly.

For example:

LAUNCH OFFER

Your first ritual starts here.

15% OFF your first order

WELCOME15

rather than having huge "SALE!!! 50% OFF!!!" banners everywhere.

The goal should be:

Premium brand → trust → desire → easy purchase → repeat purchase.

.

Note: this is just a checklist from my side I have missed some important points
please notify us and add on based upon a e commerce site
